

SHEEFA MEHREEN

MERN Stack Developer

Bengaluru, Karnataka | +91 9964571064 | shifamahreen786@gmail.com
LinkedIn: linkedin.com/in/sheefa-mehreen-3634a1278 | GitHub: github.com/shifa-m

PROFESSIONAL SUMMARY

MERN Stack Developer and Computer Science & Engineering graduate (2025) with experience building scalable, responsive, and secure full-stack applications using MongoDB, Express.js, React.js, and Node.js. Delivered 15+ RESTful APIs and improved application performance by [20]% through JWT/OAuth authentication, third-party API integration, and Git-based, Agile/Scrum workflows, with strong debugging and code-review practices.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Frontend: JavaScript, HTML5, CSS3, Tailwind CSS, Responsive UI, Component-Based Architecture

Backend: RESTful API Development, CRUD Operations, JWT, OAuth, API Integration

Database: MongoDB, MySQL

Tools & Practices: Git, GitHub, Postman, VS Code, Agile/Scrum, Debugging, Code Reviews, SDLC

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Full Stack Web Development Intern | Varcons Technology

Jan 2025 – Jul 2025

- Developed 3+ responsive, component-based web applications using React.js, JavaScript, HTML5, and CSS3, following MERN stack architecture and industry best practices.
- Built and integrated 8+ RESTful APIs, enabling seamless data exchange between the React.js frontend and the Node.js backend.
- Identified and resolved 20+ application bugs, improving system stability and reducing page load time by [15]%.
- Collaborated with a 5-member engineering team using Git/GitHub for version control; participated in Agile/Scrum ceremonies, peer code reviews, and QA testing cycles.

Software Development Intern | Viverthana Technology

- Designed and developed 6+ RESTful APIs using Node.js and Express.js to support core MERN stack backend functionality.
- Integrated MongoDB for scalable data storage and implemented CRUD operations across 4+ application modules.
- Implemented JWT-based authentication and authorization workflows, securing [10]+ API endpoints and enforcing secure coding standards.
- Executed 30+ test cases in Postman to validate API functionality, debugged backend issues, and supported application deployment and release management.

PROJECTS

Product Recommendation System | React.js, Node.js, Express.js, MongoDB, REST APIs, JWT

- Built a full-stack MERN application integrating a React.js frontend with a Node.js and Express.js backend and a MongoDB database.
- Developed and tested 10+ RESTful APIs handling business logic, JWT authentication, and CRUD data operations.
- Used Git for version control and Postman to execute 20+ API test cases throughout the software development lifecycle (SDLC).

Bird Species Identification using Audio Signal Processing | Python

- Built a Python application that applies audio signal processing techniques to classify bird species, improving model accuracy by 14% through iterative feature engineering and testing.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering

2025

Visvesvaraya Technological University | CGPA: 7.0
